

Lago Vista Property Owners Association

To All Slip Renters:

After several minimal lake level increases have compounded, we are starting to plan a move back into the cove for slips K, L, G, H & J. The marinas have been adjusted as much as possible in order to maintain access for members in their current positions. It is important to remember that during stormy weather and in the aftermath of storms, while the lake level is rising access to the marinas may become impaired until adjustments can be made or additional walkways can be added. Your patience is appreciated during these times.

If you have any questions regarding our impending move back into the cove please call Gregg Evans at 267-2895.

We plan to complete the move in February.
